Picturing the future of Humboldt power

If it weren't for the colorful mural painted on one of its gray, rectangular buildings, Humboldt Bay Power Plant (HBPP) would easily blend in with the surrounding landscape.

Featuring images of actual events and workers from the plant's past and present, the mural was commissioned by Director and Plant Manager Paul Roller as a creative and engaging way to tell the HBPP story. "I wanted to capture the unique culture of HBPP," Roller said, "so the people of the plant could see where we've been, where we're at, and how we're all headed in the same direction."

The mural was conceived as a timeline, depicting the early days of nuclear power in black and white. Following a transmission pipe image through the mural, the viewer sees the removal of the plant's transformers, a tribute to the efforts of grassroots safety teams that led the "Plus 1" initiative, and the installation of the engines for the new Humboldt Bay Generating Station (HBGS). The timeline concludes with an image of the Nuclear Regulatory Committee's license flying away—symbolic of the ultimate decommissioning of the plant. The focal point of the artwork is a torch being handed off as the old power plant is shut down and HBGS comes online.

continued on back

Picturing the future of Humboldt power continued from front

It's a lot to take in, but the mural conveys how much activity happens on this small site. The turbines, spent fuel pool racks and reactor head have all been removed, but crews continue to dismantle the old facility: At the same time, employees are manning the new facility and simultaneously preparing for future environmental remediation on the old site.

"I like to say that this is the busiest 13 acres in the state of California," Roller said.

The plant's culture places a heavy emphasis on safety. Roller himself wears a badge that says, "Tell Me" encouraging others to speak up and let him know if he is being unsafe. Even the mural's artist, Jerry Lee Wallace, had to get used to wearing a harness while painting above ground. "I admit I balked at first," Wallace said. "But I was very impressed with the safety around here."

As the plant changes from HBPP to HBGS, the culture of safety and operational excellence remains constant. HBGS delivers power to 67,809 homes and businesses, and the employees who operate it will have the mural to remind them to continue the tradition of delivering safe and reliable energy to our customers.

Instructors needed for 2011 PG&E PowerPathway™ training courses

What do PG&E retirees Matt Hanson, Rich Sanderson, Victor Robles, Floyd Wright, Tracy Foye, and Mike Martin have in common? A few years ago, each returned to the company to teach through PG&E PowerPathway™—a nationally recognized workforce development program.

PowerPathway™ courses are designed to strengthen students' candidacy for employment and increase their understanding of the energy and utility industry. In addition to pole climbing, Tracy, Mike and Floyd shared their expertise on subjects such as safety, ropes and knots, industrial ergonomics, tools and materials, worksite protection and excavation awareness. So, would they recommend the job to other retirees? You bet.

INTERESTED? In 2011, PowerPathway™ will offer customized, short-term Bridge to Pre-Apprentice/Utility Worker courses at local community colleges in San Jose, Fresno and Sacramento on the following (tentative) schedule:

San Jose
March–June
(Workforce Institute/
San Jose/Evergreen
Community College)

Fresno
May–July
(Fresno City
College)

Sacramento
August–October
(American River
College)

If you are available during one or more of these times and are interested in learning about becoming a PowerPathway™ instructor, please contact Keith Lovgren (KCL5@pge.com), or 559-263-5235, as soon as possible. For information about PG&E PowerPathway™, visit www.pge.com/careers/powerpathway.

A Thanksgiving meal for our customers

No power outage was going to ruin Thanksgiving for some PG&E customers in the stormy Sierras.

Funding from PG&E helped provide overnight shelter plus turkey and all the trimmings to customers whose power was knocked out by winter storms in Tuolumne and Calaveras counties over the Thanksgiving weekend.

"They know we're here if they need help," said Jennifer Lujan, PG&E Community Relations representative. "Because of the holiday, we wanted to make sure people had a place to go so they could still have a Thanksgiving meal."

Lujan said that two PG&E grants totaling \$10,000 to the Capital Region Chapter of the American Red Cross supplied

food, blankets, cots and other necessities serving customers at shelters in the Twain Harte area and in the town of Arnold. Both sites set up as warming centers (which usually close at 5 p.m.) transitioned to overnight shelters Wednesday through Friday.

The shelter at Word of Life Fellowship in Mi Wuk Village (Twain Harte) served more than 40 meals, plus a Thanksgiving dinner that fed 75 residents, volunteers and firefighters.

At the Ebbetts Pass Fire Department in Arnold, more than 30 meals were served over the two-day period.

"Because of the holiday, we wanted to make sure people had a place to go so they could still have a Thanksgiving meal."

PG&E's successful 2010 Coats 4 Kids drive collected over 6,000 items of warm clothing which have been donated to 57 different locations across our service territory. Agencies that received clothing items include Habitat for Humanity, homes for abused women and children and The Salvation Army.

From left, retired Executive Vice President Jim Shiffer catches up with retired Chairman and CEO Fred Mielke and retired Senior Vice President, Power Generation, Elmer Kaprielian at a retired officers luncheon hosted by current PG&E leadership.
