PG&E Continues Infrastructure Improvements to Enhance Safety and Reliability

Record-Setting Campaign for the Community Raises \$6.5 Million

Bio Cendana, a gas system operator, works at PG&E's new Gas Control Center in San Ramon.

### PG&E Continues Infrastructure Improvements to Enhance Safety and Reliability

PG&E powers new high-tech Gas Control Center to monitor pipeline safety

By David Kligman

In December, PG&E publicly unveiled our high-tech Gas Control Center in San Ramon (Contra Costa County), where employees monitor and manage tens of thousands of miles of pipeline and other system components 24 hours a day.

The new \$38 million center, which went into operation in August, brings together employees from four cities and multiple buildings into one centralized location combining distribution, transmission, dispatch and reliability planning.

The center uses real-time information—including state-of-the-art mapping and communications equipment—to ensure reliability, to better anticipate risks, and to gauge how well the system is operating.

Tony Earley, PG&E's chairman and CEO, and Nick Stavropoulos, executive vice president of the company's gas operations, hosted the event that attracted members of the media and local and national officials, including U.S. Rep. Eric Swalwell, who represents the area.

"This, to me, is just a true manifestation of what it means to be the safest, most reliable gas company," said Stavropoulos.

## 2014

# Record-Setting Campaign for the Community Raises \$6.5 Million

PG&E employees and retirees opened their hearts—and their wallets—and raised more than \$6.5 million for nonprofit organizations and schools in their communities through Campaign for the Community. It is a record amount raised through the company's annual employee and retiree giving program. It also surpasses the 2013 total by \$500,000.

In addition to the amount pledged through the Campaign, PG&E will provide nearly \$2 million in matching grants to schools and qualifying environmental organizations designated by employees and retirees through this annual giving initiative.

Pledges from the Campaign will be distributed throughout 2014 to more than 5,000 schools and nonprofit organizations. Recipients include environmental organizations, community centers, food banks, animal shelters, veterans groups and more—all of which help keep important programs and services alive in local communities throughout PG&E's service area.

Nearly 7,600 employees and 350 retirees made pledges. PG&E would like to thank all of the retirees who gave during the Campaign. Congratulations for making the Campaign a success we all can be proud of.

Since 2000, employees and retirees have raised more than \$55 million through the Campaign for Community, benefitting schools and organizations in communities where they live and work, primarily in Northern and Central California. These monies are in addition to the \$23 million PG&E donates annually throughout its service area.

Gas-system operators have specific data on monitors at their workstations and a 90-foot video wall for situational awareness.

## PG&E Continues Infrastructure Improvements to Enhance Safety and Reliability

continued from front

PG&E wasn't required to build the Gas Control Center, but Stavropoulos and **Jesus Soto**, the company's senior vice president of gas transmission operations, knew it was needed.

"This, to me, is just a true manifestation of what it means to be the safest, most reliable gas company," said Stavropoulos. "The fact that we did this in 18 months just shows that we take so seriously our commitment to safety."

Among the control center's features is a 90-foot-long video wall and smart boards that allow field personnel and system operators to analyze, share and assess important regional data in real time, including 6,750 miles of transmission pipeline and 42,000 miles of distribution pipeline. There's also a simulation facility to ensure operators can readily address a wide range of potential emergency situations and hone crisis prediction and management skills.

Opening the center is just the latest milestone for PG&E's gas operations team, which completed 150 miles of hydrostatic testing and replaced 42 miles of pipeline in 2013. Over the past two years, PG&E has:

- invested more than \$2 billion to upgrade its gas system
- led the country in hydro testing pipelines
- installed more than 107 automated pipeline valves, by far the most of any U.S. gas utility
- replaced gas pipeline main at a rate 10 times greater than three years ago.

## Help Spread the Word: PG&E Employee Resource Group Scholarship Deadline is February 16

PG&E Employee Resource Groups (ERGs) are accepting scholarship applications, now through Sunday, Feb. 16, from college-bound high school students and current college students. At least 100 students throughout our service area will receive scholarships of up to \$6,000. Students can apply to more than one ERG by filling out the supplemental application for that ERG. PG&E employee dependents are eligible too! Visit www.pge.com/en/about/community/education/ergscholarships/index.page for complete ERG scholarship information, including criteria and applications.

#### Follow Our Progress

We have good news to tell about our progress, about the pride our employees and retirees have for PG&E, and the work we're doing to provide our customers with affordable, reliable and, above all, safe gas and electric service.

Currents (pgecurrents.com) is a great source of PG&E news and perspectives, and our new See Our Progress website—pge.com/SeeOurProgress—is helping customers and the public see the work we're doing to create the nation's safest and most reliable gas system.

PG&E has more than 14 social media properties, including Facebook, Twitter, YouTube, LinkedIn and Instagram. If you haven't already done so, we encourage you to like us, follow us and join the conversation!
